The Easy2Clean Tray - because cleaning should be easy

With its innovative ceramic coating, the Easy2Clean Tray lets you cook without baking paper, and also doesn't allow grease and dirt to stick. So, all you need is hot water, a wet cloth, and some dish soap, for hassle-free cleaning.

A self-cleaning oven

With one touch of the Pyrolytic cleaning function, dirt, grease and food residue in the oven is converted into ash that you can easily wipe off with a damp cloth.

Absolute accuracy, every time

The clean glass display with touch buttons gives you even more control over your cooking. The timer is activated by entering start/stop through the LCD screen. Meaning you can expect absolute accuracy - even if you momentarily step away from your oven.

Cooked Evenly everywhere

With this oven, using energy efficiently also means cooking efficiently. It has a new convection system called Hot Air, which ensures hot air circulates evenly throughout the oven cavity. The result is that the oven heats up faster and cooking temperatures can be reduced by up to 20%, saving you both time and energy
