Simple start-to-finish toasting

Simple start-to-finish toasting: Select any, or all, of the three special toasting functions (defrost, bagel, or keep warm), and the Toaster will automatically move from one step to the next without any additional effort on your part.

USING THE TOASTER

Toasting

English

- 1** Select your desired shade by turning the shade control knob to the right for darker toasting or to the left for lighter toasting. To reheat toast that has cooled, turn the shade control knob to the far left of the shade control settings.

NOTE: The age, type, and moisture level of different breads may require different shade settings. For example, dry bread will brown more rapidly than moist bread and will require a lighter setting.

- 2** Insert bread or other food to be toasted into the slot(s).

NOTE: For even toasting, toast only one bread type and thickness at a time. If toasting bagels, be sure to press the Bagel button. See "Toasting bagels."

- 3** Press down on lift lever to start the toasting cycle. If Keep Warm (☺) isn't selected, the toast will rise automatically at the end of the cycle and the Toaster will turn off.

NOTE: To activate the Keep Warm (☺) function, press down on the lift lever, then press the KEEP WARM (☺) button.

- 4** To cancel toasting at any time, press CANCEL (▲). The Toaster will raise the toast and turn off.

TIP: For smaller items, lift up on the lift lever to raise toast above the top of the Toaster.

SPECIAL TOASTING FUNCTIONS

Toasting Bagels

 Your Toaster features a special setting for bagels, ensuring optimal heating time for the best results. The heating elements will adjust to nicely toast the inside of a cut bagel without burning the outside surface.

1 Insert bagels with the cut side facing in, as shown.

2 With the shade control knob set to your desired shade, press down on the lift lever to start the toasting cycle.

3 Press BAGEL (). The Bagel indicator light will glow. If Keep Warm isn't selected, the bagel(s) will rise automatically at the end of the cycle and the Toaster will turn off.

TIP: The Bagel () function can be used at the same time as the Defrost () and Keep Warm () functions.

SPECIAL TOASTING FUNCTIONS

Defrosting

 The Defrost function adds additional time to the toasting cycle to defrost frozen bread before toasting it.

TIP: The Defrost () function can be used at the same time as the Bagel () and Keep Warm () functions.

SPECIAL TOASTING FUNCTIONS

Keep Warm

 The Keep Warm function holds toast in low, gentle heat for 3 minutes after toasting.

1 Insert bread or other food to be toasted into the slot(s).

2 With the shade control knob set to your desired shade, press down on the lift lever to start the toasting cycle.

3 Press the KEEP WARM  button. The Keep Warm  indicator light will blink slowly.

4 When the toasting cycle is complete, the Keep Warm  indicator light will stop blinking and glow continuously while the toaster keeps the toast warm for 3 minutes after toasting.

TIP: The Keep Warm  function can be used at the same time as the Bagel  and Defrost  functions.

SPECIAL TOASTING FUNCTIONS

Lift & See

With the Lift & See feature, you can check toasting progress without stopping the toasting cycle.

- 1 Raise the lift lever any time during the toasting cycle to view the toast's progress.

- 2 Press down on lift lever to lower the toast back into the toaster.

TIP: For smaller items, lift up on the lift lever to raise toast above the top of the Toaster.

CARE AND CLEANING

IMPORTANT: The tray will be hot immediately following a toasting cycle. Allow Toaster to cool before emptying the crumb tray.

- 1** Unplug the Toaster and let it cool before cleaning. Plug will vary by region.

- 2** Wipe Toaster with a soft, damp cotton cloth. Do not use paper towels, abrasive cleansers or liquid cleaning products. Do not immerse Toaster in water.

NOTE: If grease or oil splatters on the Toaster, wipe splatters away immediately using a clean, damp cotton cloth.

- 3** Press "PUSH" (located in center of the crumb tray) so that it opens slightly, then slide it out of the Toaster. Shake the crumbs into a waste container. For consistent browning results, empty the crumb tray after each use. Crumb tray is hand-wash only

- 4** Return crumb tray to Toaster. Press in on the center of the crumb tray until it clicks into position. Do not use the Toaster without the crumb tray fully in place.
