

### Better baking happens with steam

The 5000 SurroundCook® Oven with SteamBake is a multifunction oven that uses steam for perfect baking – dishes are golden-crispy outside while the inside remains tender and moist. And every dish is evenly cooked without having to turn or move the tray.

## Product Benefits & Features

### SteamBake. The best baking results use steam

The SteamBake multifunction oven lets you add steam while baking. Dishes have better colour and crust, and are heated evenly without having to turn the tray or dish.

### Food Sensor – for precise temperature control

The Food Sensor allows you to precisely monitor your cooking for perfect results regardless of the recipe. The oven will let you know when your food has reached the right temperature.

### EXPLORE. Easy access to your oven's functions

EXPLORE allows you to effortlessly control the settings of your oven to know what's happening with your cooking. With the LED display and WiFi connectivity, you can easily see the time, temperature and progress of your dish.

### Easy to wipe clean with Catalytic partial cleaning

With Catalytic Cleaning, the oven is coated with a special catalytic porous surface of the rear wall that absorbs and oxidizes grease, and a clean enamel cavity. The result is easy cleaning with just a damp cloth.

### Get connected. And change the way you cook

Connectivity lets you control your oven from anywhere with our app. Get tips and improve cooking techniques with app-controlled functions at your fingertips.

- Built-in oven
- Multifunctional oven with ring heating element
- Oven energy class: A+
