THREE KEY BENEFITS

1

Big sound made for the big screen

Designed for today's big screen TVs, this three-unit system delivers super wide surround sound, with audio tuned by leading movie sound engineers to bring cinema level immersion straight into your home.

360 Spatial Sound

Our innovative 360 Spatial Sound Mapping technology creates phantom speakers around you, reflecting sound off your ceiling and walls, positioned to mirror a cinema layout. As it enables much wider coverage, everyone can enjoy the same elite level of immersion, wherever they are in the room.

2

3

Best with BRAVIA

- **Voice Zoom 3:** "Voice Zoom" function allows you to adjust the volume to your liking. No more struggling to hear low voices or dialogue in your favourite movies.
- **Quick Settings Menu:** Sound settings will automatically appear on the TV's Quick Settings menu, so you can quickly and easily control your Sound Field, volume, and more.

SONY

Non-contractual visuals, information in this datasheet is subject to change without notice.
